Product Development · Rapid Prototyping · Physical UX · Design for Manufacturing
Fabrication · Ergonomics · Interdisciplinary Collaboration · Material Exploration

PROFESSIONAL EXPERIENCE

Contract Mechanical Engineer Equipment and mechanism design Remote, USA
Independent Consultant Current

- Integrated quickly into complex hardware programs across distributed product teams.

Swivl Inc. Audio/video robots for AI reflection in schools Menlo Park, California, USA
Product Design Engineer Mar 2020 – Dec 2023

- Owned all design and production of a wearable device from pre-concept through launch.
- Built prototypes using rapid iterative design-test cycles and direct user feedback.
- Designed a novel grip and frame system improving ergonomics, durability, and tactile feel.
- Led CMF development, packaging, visual updates, manuals, and brand-aligned refinements.
- Collaborated with industry experts to develop aesthetics, ergonomics, and usability, refining button feel, component selection, lighting, and audio performance.
- Coordinated global supplier production, QA, and troubleshooting remotely and overseas.
- Supported 10x sales growth as Operations Manager during COVID-19 supply chain challenges.

KEA Technologies Inc. R&D engineering company Marlborough, Massachusetts, USA
Associate Engineer Co-op Jul – Dec 2018

- Developed design for additive manufacturing, 3D scanning, and 3D printing skills while integrating automotive electro-chemical sensors and drafting for US patents.

Sentio Inc. Equity research management software San Francisco, California, USA
Product, Sales & Marketing Co-op Jul – Dec 2017

- Analyzed marketing data/costs, curated socials, and contributed to publications (incl. Forbes).

Eastek International Contract manufacturing services Dongguan, China
Manufacturing Engineer Co-op Jul – Dec 2016

- Developed bespoke project management software, plastic resin reuse, and a PFP wage system.

EDUCATION

Northeastern University Boston, Massachusetts, USA
Bachelor of Science in Mechanical Engineering 2019

SKILLS

Tools: SolidWorks, Adobe Suite, Figma, Arduino, VX Elements, Netfabb, ReCap 360

Fabrication: 3D printing, CNC, laser cutter, injection molding, shop and hand tools, sewing

INDEPENDENT WORK

- Founder and designer of a circular-fashion initiative focused on storytelling through reclaimed clothing and globally sourced textiles from communities most impacted by the industry.
- Experimenting with mycelium forms and textile waste reuse as alternative material systems.
- Scanned, edited, and fabricated a 3D-printed cutlery set exhibited at the Boston Design Center.
- Directed a team in Nigeria researching practical responses to community-defined issues.
